

About Me

My name is Zach Chan, I'm studying software engineering with ASU. My passion for programming stems from creating small mods for video games like Terraria, Minecraft, and Starsector. I just want to create things I deem "cool". My main goal is to become a software developer of sorts. I'm not too picky here because I enjoy learning new things, and I enjoy the breadth of programming.

Experience

From both my own side projects and schooling I have coding experience in a few different languages:

- Python
- HTML
- CSS
- C#
- Java

Education

Sandra Day O'Connor High School

High School Diploma

2020
